

Peer Power Project B Final Presentation

#fa24-group1-peerfeedback

1. Project summary from Project A

Melody Hammer

UX Topic

Improving Peer Feedback: Receiving peer feedback on assignments is a frequently used activity in some educational programs. You will explore the feedback process and identify the needs and pain points of givers and receivers of feedback in order to develop solutions to improve the quality of feedback.

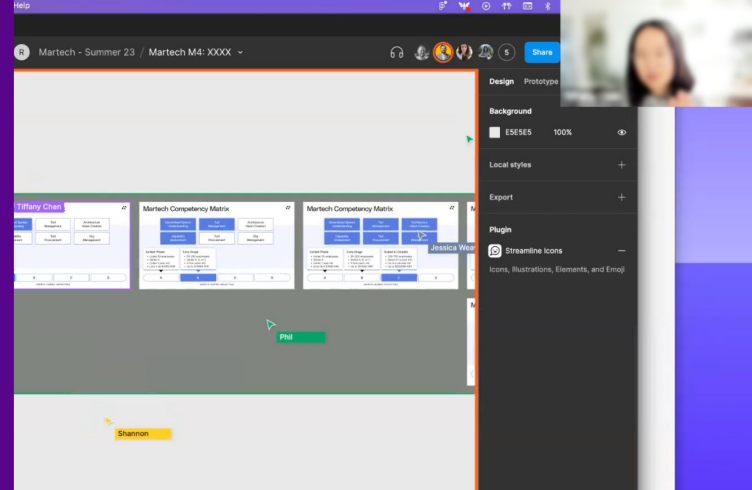

Narrowing the scope

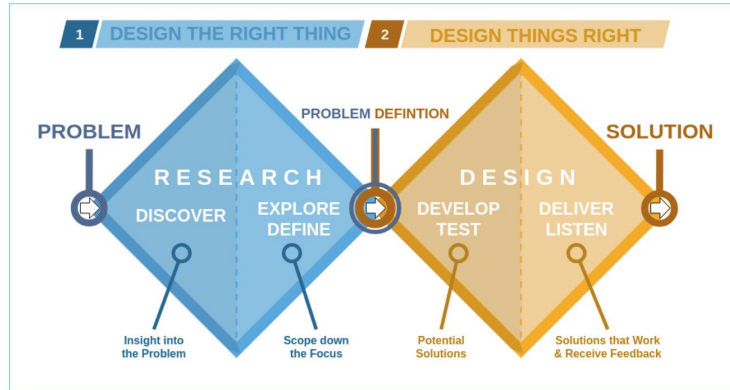

Students

Art and Design Students

- Vague Feedback
- Overly Critical or Harsh Tone
- Lack of Actionable Suggestions
- Bias and Subjectivity
- Time Constraints
- Lack of Context

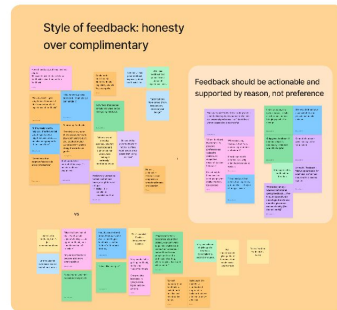

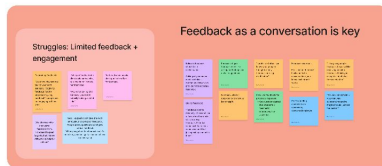

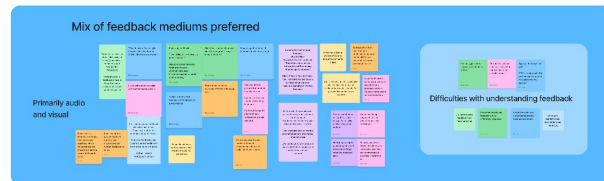

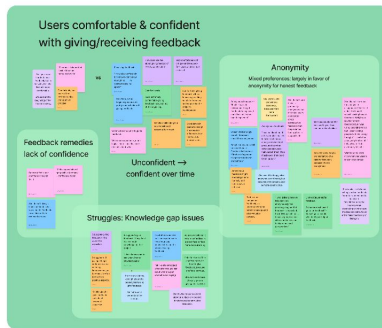

Problem statement

Starting Question: What opportunities are there to **improve the experience** of **commenting** and **receiving** feedback on **visual** assignments for **design** and **art students**, so that commentary is well-received and promotes engagement in both giver and receiver?

Interviews, Surveys + Affinity Mapping

Personas

First-Year Fretter

Unaccustomed to giving feedback

Gives more honest feedback when **anonymous**

Prefers feedback **annotated directly** on their work

Wants feedback that is **positive** and **constructive**, helping them improve their work and build their confidence

Seasoned Senior

Very comfortable with giving feedback

Wants to **interact** with their feedback partners and build a conversation

Prefers **audiovisual feedback** like a conversation

Dislikes shallow or only complimentary feedback; wants **honest** and **specific**, even if they don't like what they hear

Next steps on ideation

Customization options for feedback preferences:

- Mode of feedback (audio, visual, written)
- Phase of project (warrants specific types of feedback)
- Tone of feedback

Structured resources to guide users on how to provide meaningful peer feedback

- Feedback rubrics
- Flowchart to structure feedback
- Provide clear examples to follow

2. Ideation

Minami Matsumoto

Key focus areas

Research question:

"How can we enhance the experience of giving and receiving feedback on visual assignments for art and design students to make it more engaging and well-received?"

Key Focus Areas:

- Make feedback constructive, supportive, and well-received
- Address challenges in delivering empathetic, mindful feedback
- Organise and track feedback to enhance accessibility and engagement

Ideation: Defining User Needs

User Need Statements

Emily: Needs confidence in giving feedback

Midori: Needs active engagement with feedback

Lee: Needs clarity in tone for written feedback

Scenarios

2 for Fret: Confidence and targeted feedback

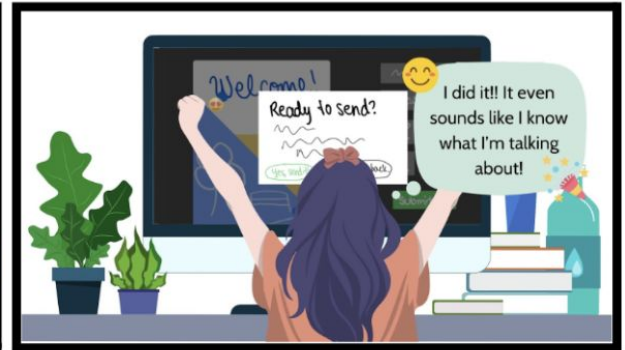

2 for Seasoned: Engagement and tone clarity

Storyboards

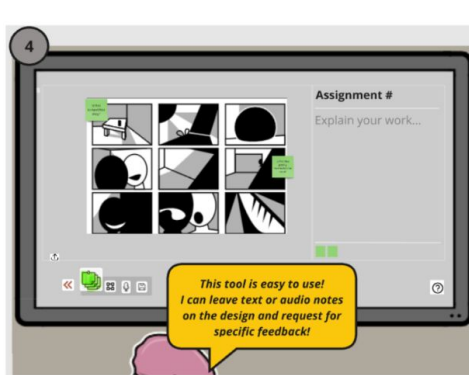

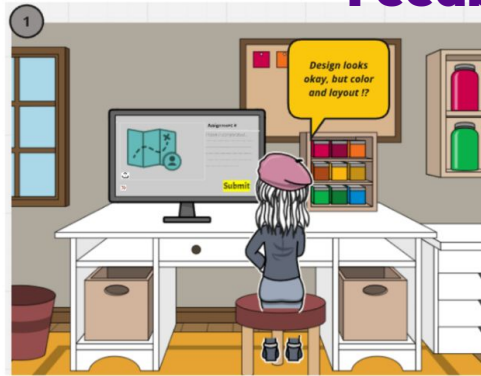

Visualised each scenarios to 6 panels

Refine ideas by illustrating user interactions and highlighting gaps in the proposed solutions

Emily: Navigating feedback with Confidence

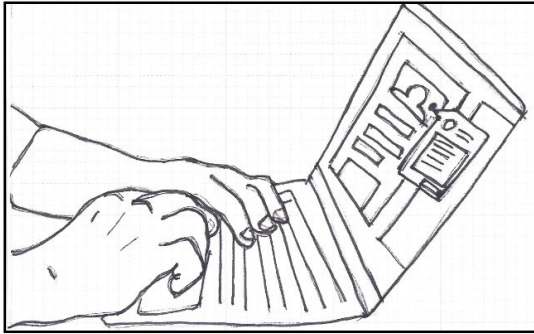

Fret: Receiving Targeted Feedback

Midori: Staying Engaged with notifications

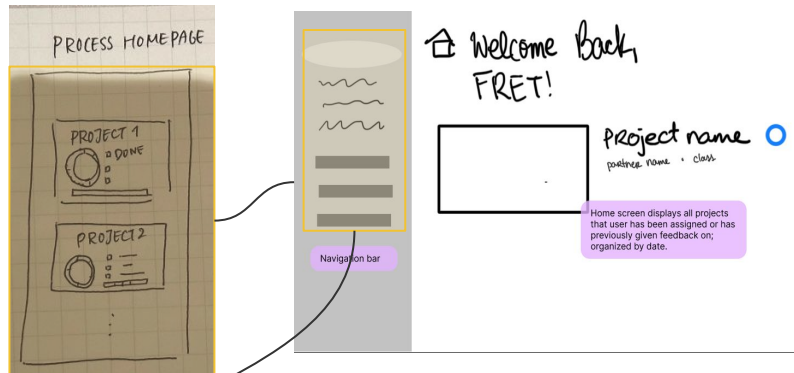

Lee: Ensuring Clarity with Voice Notes

4. User Research & Heuristics Evaluation

Sridevi Turaga

USER RESEARCH OVERVIEW

USABILITY TEST PLAN

- Uploading a project
- Open partner's project & view comment
- Open and reply to comment
- Review profile page

Observations (mistakes, alternate paths, quotes, etc)	P1	P2	P3	P4	P5	P6	Possible solution
TASK 1: Upload project							
CTA (Add project) very clear							
Style & tone indicators are confusing							Onboarding/profile option selections should make it clear; but adding labels to them could also assist
Select project dropdown is confusing							Maybe change the prototype to have a 2-3 option dropdown menu
Confusion over what 3 days meant							Prototype error, solved
Liked ideation phase options							
Confused by purpose of ideation phase options							Add label; potentially consider reworking what we call the stages. (maybe early stage / middle stage / late stage?)
Labels (project description, feedback guidelines, etc) unclear							Take out of the add project page completely
Didn't try save button							
TASK 2: Read and reply to feedback							
View project button hidden/not noticeable							Potentially add a button at the top by the title
Easy to find view project button							
Confusion on how to start							Onboarding for first time users; tool tips. This might also be a result of our failure as facilitators to describe the task well.
Too much information							Maybe keep the dropdown menus defaulted to closed (except comment history). Minimize information and allow users to open them if they need it

KEY FINDINGS: SOURCES OF CONFUSION

The screenshot shows a web interface for a project titled "Solar Project Poster" by Minami Matsumoto. Two red boxes and arrows highlight specific areas:

- A red box around the "Community Projects" tab in the top navigation bar, with a red arrow pointing to it from the left.
- A red box around the user's name "Minami Matsumoto" and their bio "Visual Arts Management, 2026", with a red arrow pointing to it from the right.

Below the user information, there are two icons: a speech bubble labeled "Written, Audio" and a lightbulb labeled "Honest".

The main content area features a large black and white graphic with the text "INDUSTRY SNAPSHOT" and "40%". A "VIEW PROJECT" button is visible at the bottom of this graphic.

On the right side, there is a section titled "Fall 2024 User Experience Design" with a sub-header "Informational Poster". A red circular badge with a flame icon and the text "3 Days Left" is positioned next to the title. Below this, a "Project development stage" section shows a progress bar with five stages: Ideation, Planning, Creation, Refinement, and Presentation. The "Creation" stage is currently active.

Below the progress bar, the "Project details" section contains a paragraph of placeholder text: "Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aliquam ultricies mollis risus et mattis. Praesent diam leo, lacinia pharetra faucibus vel, hendrerit vitae mauris. Fusce egestas scelerisque lorem, quis sagittis neque dignissim vitae. Nunc sit amet arcu interdum, dictum justo et, dapibus velit."

At the bottom right, there is a "Project Description" dropdown menu.

Fall 2024 User Experience Design

Can you give me feedback on my font and color choices? I'm a little concerned about that part.

Comment History

My opinion is that the contrast isn't strong enough! You should make one of the colors darker.

This needs a clearer font. Right now the flourishes are making it look overly crowded and hard to read.

DESIGN CHANGES: DESIGN & HEURISTIC EVALUATION

The screenshot shows the PEEER website interface. At the top, a navigation bar includes a home icon, the PEEER logo, and a user profile icon. Below the navigation bar, a user profile for 'First-Year Fretter!' is displayed, featuring a circular profile picture, a welcome message, and a button to 'ADD NEW PROJECT'. The main content area is titled 'Cellular Informational Poster' and features a project by 'Minami Matsumoto' from 'Visual Arts Management, 2026'. The project includes a colorful illustration of a cell with labels for 'Mitochondrion', 'Nucleus', and 'Cell Membrane'. To the right of the illustration, there is a 'Fall 2024 User Experience Design' section with a '5 Days Left' countdown timer. Below this, a 'Development Stage' progress bar shows five stages: Ideation, Planning, Creation, Refinement, and Presentation. The 'Details' section contains a text update: 'I've added some text labels made the colors stronger and more dynamic. I'd like it if you could give me your opinion on the placement as well as the colors I've used.' At the bottom, there are expandable sections for 'Project Description' and 'Rubric'.
